Communication

ACHIEVEMENTS

Job: Develop, maintain and support application programs for administrative, Web and mobile systems using Java and related tools. Analyze code for system testing and debugging; create test transactions to find, isolate and rectify issues; and manage a team of three programmers.

Accomplishments: Reengineered multiple systems that fueled improvements to productivity, efficiency, uptime and accuracy for global business operations. Developed code system design and test/QA plans all solutions and often coordinated the national or international rollout.

Led, architected and participated in the design, testing and deployment of client/server, multitier applications, ActiveX and related components.

Developed new procedures for requirements gathering, needs analysis, testing, scripting and documentation to strengthen quality and functionality of business-critical applications.

Developed large-scale, portable, thread-safe and ultra-high performance foundation and application infrastructure libraries. Trained and mentored junior programmers in programming methodologies and best practices.

Delivered back-office tools supporting ecommerce initiatives, enabling company to compete more effectively in the marketplace through search-engine optimization.

Served as a core group member in defining and prioritizing technology investments for the next two years, ensuring the alignment of process, technology and business objectives.
